v.43
1935

INDEX TO ILLUSTRATIONS

Aitken, Professor Robert G., and Mrs. 145
American Astronomical Society—
Philadelphia, Pennsylvania, December 27-29, 1934, Plate II .....Op. 75
Toronto, Ontario, Plate VII .....Op. 471
Asteroid, Chart showing path of Ceres 128
Juno 505
Vesta 389
faint, and Comet 1935 *d*, on August 21, 1935 542
Astrolabe constructed by Artemus B. Henningsen, An 352
Astronomical association, Members of the East Bay, in front of Chabot Observatory, Oakland, California 139
Bailey, Dr. H. Page, and his 15-inch reflector at Riverside, California 134
Belopolsky, A. A., Ferdinand Ellerman, Edwin B. Frost, Photograph taken July 16, 1899 16
Chateau neuf at Meudon 481
Comet 1935 *d* and faint asteroid, on August 21, 1935 542
The orbit of, relative to the orbits of the earth and Jupiter.... 607
Johnson, 1935 February 27 255
Orbit of, in relation to orbit of the earth 256
Comstock, George Cary, Plate I .....Op. 1
Dormitory at Lick Observatory 144
Eclipse of the moon July 16, 1935, Total 350
sun, December 25, 1935, Annular 23
February 3, 1935, Partial 21
June 30, 1935, Partial 21
Eclipses belonging to the saros cycle ending 1935 January 5, Approximate tracks of the umbra during some of the central 11
during the 78 saros intervals of the cycle ending 1935 January 5, Distribution patterns of solar and lunar 12
Nos. 13 to 16 of the ascending-node saros cycle running since 1664 August 21, Partial 96
Nos. 48 to 50 of the descending-node saros cycle running since 991 April 17, Annular 97
Nos. 51 to 53 of the descending-node saros cycle running since 991 April 17, Partial 97
of solar saros series S13, Duration of intervals between 627
the saros cycle ending 1935 January 5, Exeligmos curves joining the noon points of the central 10
Saros series of lunar, 500 B.C. to A.D. 1500 207
Edwin Brant Frost, 1866-1935, Plate VIII .....Op. 545
Ellerman, Ferdinand, Edwin B. Frost, A. A. Belopolsky, Photograph taken July 16 1899 16
Eyepiece and panel board of the horizontal telescope of the Roslyn House Observatory 204
Farnsworth, Dr. Alice H., and the screen of the Crossley reflector 275
Fisher, Willard James 476
Frost, Edwin Brant, 1866-1935, Plate VIII .....Op. 545

Frost, Edwin Brant, A. A. Belopolsky, Ferdinand Ellerman, Photograph taken July 16, 1899 16
Garden on Mount Hamilton, In Mrs. Wright's 276
George Cary Comstock, Plate I ..... Op. 1
Gregorian calendar years of the 5-solar type 415
with 3 lunar eclipses 554
Halsted Observatory, Princeton, New Jersey 147
Julian calendar years of the 5-solar type 414
with 3 lunar eclipses 555
Lick Observatory 140
Littlehales' chart for solving spherical triangles 92
Longitude of successive ecliptic conjunctions of solar saros series S13, Increase in 626
Lunar saros series, Five groups of six 210
Menzel, Dr. Donald, at the rim of the Crossley reflector 279
Messier 35, in Gemini, Photograph by Woods and Watson 424
46, in Puppis, Photograph by Woods and Watson 425
Meteor of February 19, 1935, Path of daylight 460
January 2, 1927, Path of 605
January 24, 1934, Path of 382
July 25, 1929, Path of 248, 249
November 24, 1934, Path of 316
Meteoric material, Curve showing the annual deposit of 121
Meteorite crater, Odessa 36
Front view of the Lafayette 404
Side view of the Lafayette 405
The base of the Lafayette 406
Photograph of Fayetteville 384
The Athens (Ala.), Photographs of 332, 333
Siberian, in 1908, Map of region of fall of 596
Nova Herculis, Changes in the spectrum of, in the photographic region, Plate III ..... Op. 265
visual region, Plate IV ..... Op. 265
Spectra of, in the photographic region, Plate V ..... Op. 323
visual region, Plate VI ..... Op. 323
Objective and siderostat of the 15-inch horizontal telescope of the Roslyn House Observatory 203
Observatory, A general view of the Roslyn House 199
Lick 140
Princeton, New Jersey, Halsted 147
The new 150
Starcrest, exterior 409
interior 411
The Paris 479
Occultations, Chart to aid in the prediction of 283
Planets for 1935, Visibility of the 18
Reflector at Riverside, California, Dr. H. Page Bailey and his 15-inch 134
Home of the 36-inch Crossley 274

Reflector, Messrs. Goin and Weisiger and their 191
The 28½-inch, of the Roslyn House Observatory 201
Skaggs, J. H., and his observatory, Oakland, California 137
Solar saros series, 1208 B.C. to A.D. 2161, Cylindrical diagram of 341
Spectroscopy, Schematic representation of characteristics in 487
St. John, Dr., at the spectrograph 615
in his study 612
Sun house of the Roslyn House Observatory 200
Sunset, Watching the, from the parapet on Mount Hamilton 277
Telescope, Mr. J. B. Duryea and his 387
Time signals on short-wave radio, Diagram illustrating method of transmission of 154, 155
Triangles, Littlehales' chart for solving spherical 92
Zenith distance and atmospheric absorption, Diagrams for the graphical computation of 14, 15
Diagram illustrating measurement of 84

GENERAL INDEX

Amateur astronomers association 610
telescope makers of Chicago, *Wm. Callum* .....
.....62, 130, 189, 259, 319, 386, 466, 467, 544, 661, 662
Amateurs, An exhibit of the work of 190, 609
Notes from 62, 130, 189, 259, 319, 385, 466, 544, 609, 660
American Astronomical Society—
The fifty-third meeting of the, *Dean B. McLaughlin* 75
fifty-fourth meeting of the, *Curvin H. Gingrich* 471
American Meteor Society, Meteor notes from the, *Charles P. Olivier*.....
.....28, 116, 178, 239, 307, 376, 455, 498, 594, 654
Meteorological Society, The 321
Annual deposit of meteoric material, The, *C. C. Wylie* 120
Anthelion, Note on an, *Joseph Ashbrook* 610
Ashbrook, Joseph, Note on an anthelion 610
Asteroid notes, *Hugh S. Rice* 128, 257, 320, 388, 468, 505, 608, 663
Asteroids named 65
Astrolab astronomical associates 320
observing program 385
Astrolabe of today, An, *Artemus B. Henningsen* 351
Astronomical association, The Columbia (S. C.) 189, 320
fraternity of the world, The, Part XIII, *David B. Pickering*.. 133
Part XIV, *David B. Pickering*.. 273
society bulletin, The Milwaukee 195
Cleveland 394, 466, 660, 661
Louisville, *Elizabeth Breitenstein* 62
The Joliet 192, 663
Nevada 195
Royal 260
Toledo 260, 386, 609
Astronomy at the University of Michigan 69
without a telescope, *Harold D. Babcock* 81
Atmospheric absorption, The graphical computation of zenith distance and,
R. F. Boyer 14
